```

This screenshot shows the Visual Studio Code editor with the file `SandP.java` open. The Explorer sidebar on the left shows a project named `OOJ LAB-TEST2` with files `Student_Aca`, `Proctor.java`, `Student.java`, and `SandP.java`. The main editor area displays the code for `SandP.java`, which includes a `disps` method with a loop, and static methods `gets`, `disps`, `getp`, and `dispp` for interacting with `Student` and `Proctor` objects. The status bar at the bottom indicates the current position is Line 5, Column 2.

```
26
27     {
28         disps(s[i]);
29     }
30     for(int i = 0; i<np; i++)
31     {
32         dispp(p[i]);
33     }
34
35     static void gets(Student k)
36     {
37         k.get_s();
38     }
39     static void disps(Student k)
40     {
41         k.disp_s();
42     }
43     static void getp(Proctor k)
44     {
45         k.get_p();
46     }
47     static void dispp(Proctor k)
48     {
49         k.disp_p();
50     }
51 }
```

This screenshot shows the Visual Studio Code editor with the file `Student.java` open. The Explorer sidebar on the left shows the same project structure as the previous screenshot. The main editor area displays the code for `Student.java`, which includes package declarations, imports, class declarations, and methods `get_s` and `disp_s` for handling user input and displaying student information. The status bar at the bottom indicates the current position is Line 12, Column 76.

```
1 package Student_Aca;
2 import java.util.*;
3 public class Student
4 {
5     public String usn, name;
6     public int age, procid;
7     public double cgpa;
8
9     public void get_s()
10    {
11        Scanner sn = new Scanner(System.in);
12        System.out.println("For Student\nEnter the USN, Name, Age, Proctor ID and CGPA");
13        usn = sn.nextLine();
14        name = sn.nextLine();
15        age = sn.nextInt();
16        procid = sn.nextInt();
17        cgpa = sn.nextDouble();
18    }
19
20    public void disp_s()
21    {
22        System.out.println("Name: "+name+"\nUSN: "+usn+"\nAge: "+age+"\nProctor ID: "+procid+"\nCGPA: "+cgpa);
23    }
24 }
```

```
1 package Student_Aca;
2 import java.util.*;
3 public class Proctor
4 {
5     public int pid;
6     public String name;
7
8     public void get_p()
9     {
10         Scanner sn= new Scanner(System.in);
11         System.out.println("Proctor Details:\nEnter the Proctor id and Name");
12         pid = sn.nextInt();
13         name = sn.nextLine();
14         name = sn.nextLine();
15     }
16
17     public void disp_p()
18     {
19         System.out.println("Proctor ID: "+pid+" Name: "+name);
20     }
21 }
22
```

OUTPUT

```
